

VPN:

We use different VPN profiles for all my accounts, but they all share the same location, like this:

We use Proton VPN, but you can choose whatever VPN provider you want.

Since I'm from Germany, all the servers I use are in Frankfurt. Always choose server locations near you because Pinterest can recognize your device's IP.

We log into all accounts from the same PC, which isn't ideal, but we've never had major issues when using a VPN.

Browser:

We use either Firefox or Chrome - these browsers have shown the least complications or bans in all my tests.
