

Not all Pinterest accounts are created equal and neither are their issues. Some need a full system cleanse. Others just want to wipe one messy board. And some just want the easiest option possible.

That's why we've made three powerful automations.

Let's break them down:

### 1. The Quick Fix

Name: *Delete Underperforming Pins – Simple Version*

-  Super easy setup
-  Limited to max 250 pins per board
-  Great for: beginners, test runs, one-off cleanups

### 2. The Power Scrubber

Name: *Delete Pins Across All Boards*

-  Scans all your boards
-  Supports more than 250 pins per board
-  Fully automated batch cleanup
-  Great for: large accounts, agencies, power users

### 3. The Precision Cleaner

Name: *Delete Pins in One Board*

-  Focuses on just one board
-  Supports more than 250 pins per board
-  Use it when you want to deep-clean a specific topic or board
-  Great for: niche strategies, isolated testing, focused cleanup

So, which one should you use?

Feature	The Quick Fix	The Power Scrubber	The Precision Cleaner
Multi-board support	✓	✓	✗
Supports 250+ pins per board	✗	✓	✓
Pagination/bookmarking	✗	✓	✓
Szenario complexity	★	★★	★★
Best for...	Starters	Power users	Focused cleanup

💡 *Not sure which one fits your case?*

Here's a quick cheat sheet:

- 📌 Just testing things out? → Start with Version 1
- 📌 Want to clean your whole account in bulk? → Use Version 2
- 📌 Want to focus on a specific board? → Go with Version 3

⚠️ Safety Reminder

All versions delete pins permanently.

So before going all-in:

- Test first
- Back up your blueprint

In the next chapters, we'll walk you through each automation, step by step, with setup, logic, filters, and pro tips.
