

To improve the quality of your AI images and match the style of top-ranking pins (giving your pins a better chance to perform well), I recommend doing this:

💡 This works especially well for AI-generated images involving people (e.g., nails, makeup, hairstyles, outfits, weddings, etc.).

### Get better quality AI images:

1. Download 3 images of the top-performing pins in an incognito tab.
2. Upload them to ChatGPT.

3. Let ChatGPT create prompts based on those images.

### ChatGPT prompt:

Please create 10 MidJourney prompts that generate images in the exact same style as the attached examples.

The keyword is: [Insert Your KW]

Avoid numbering, quotation marks, and the inclusion of '--v 5 --ar 4:5' in the prompts.

You can easily automate this by using our [Prompt Generator](#).
