Generate Titles

How It Works:

1. Enter your keywords (one per line).
2. Select your niche and KW intent (all KWs should have the same intent—otherwise, group them accordingly beforehand).
3. For listicles, choose a specific number to be included in the title.

Once generated, simply add the titles to your overview sheet. This saves you a lot of time by eliminating the need to brainstorm catchy titles for each article manually.

In just 2 minutes, you'll have optimized titles for all your KWs.
