We get the best results with 8-12 pins/day. This is what I'd recommend to you too.

Efficient Pin Upload

1. If you have multiple accounts, turn on your VPN (always use the same location for one account group, max. 10 accounts in one group). More about this [here](#).
2. Open Pinterest.
3. Click "[Create Pin for ad](#)" - don't worry, it won't create an actual ad.

4. Drag 4 images into the scheduler that'll link to the same URL.
5. Click the circle in the top right > select all > click the paintbrush icon.
6. For these 4 pins, choose your board, and add a title, description, and URL.

A screenshot of the 'Edit info' form for pins in Pinterest. The form is titled 'Edit info' and is set against a dark background. It contains the following fields: a 'Board' dropdown menu with 'Coffin Nails' selected, a 'Title' text input field, a 'Description' text input field, and a 'Link' text input field. At the bottom left of the form, it says 'Editing info for 5 Pins'. At the bottom right, there is a red button labeled 'Update info'.

7. Repeat this with 4 more pins for another article, and also add 2-4 Scout Pins without a title, description, or URL.

Note:

The risk of your account getting caught in a spam filter by uploading 4 pins to the same URL is extremely low.

In my 5 years of doing this, I've never had issues with that, and it's the oldest uploading method I use.

You can find all further details in [this module here](#).
