

It's simple math:

If you plan to upload 8 pins per day, each linking to a different URL, you'll need at least 8 articles to start with.

I typically post 20-25 pins per article, but only one per day.

To stay efficient, I highly recommend preparing all 20-25 pins per article in advance.

This way, you'll have enough time to focus on creating new articles instead of having to create new pins every day.
